E-20 Order Form (Revised Jan, 20, 2016)

The Willamette Modelers Club has assembled a pack of equipment to get you started in the E-20 event. Most fliers will only need a timer, a motor, a battery and some props. Although we sell the needed single cell Li-Po battery, you can usually get a suitable one locally for less money. A battery charger will be needed, but many RTF electric models come with one, or you can get one online from EBay for a few dollars.

The equipment we sell is assembled and made by hobbiests, and although a stock is generally on hand at all times, we sometimes run out. All timers are now plug and play (PNP), no soldering needed. We will also remove the brass gear that comes on each motor if you wish (at an additional fee). Orders will be filled in the sequence received. We ask that orders are limited to no more than 3 of any one item. We have assembled a pack that includes the timer, a motor and two props. It also comes with instructions. Instructions and three views of example models can be found on our website <Willamettemodelersclub.weebly.com>

Individual Items Ordered Separately		**Order Quantity**	**Item Total Cost**
